Step 2

- Now we will customize the exchange (1st Picture)
- Click on BTC and search for whichever asset you are wanting to send (for this example, we are using litecoin LTC)
- Then Click on ADA below which is the receiving crypto and change it to either Theta or Theta fuel or in the future, whatever crypto you would like to receive.
- Once you have both cryptos selected (2nd picture) then you need to put in the amount of crypto you are wanting to send (we are using 1 LTC in this example, 2nd picture) and as you can see for this example, I would received 36.68 Theta in return at current market rates. Now you will click exchange at the bottom

C4C Exchange Guide

Page 5

Step 5

- The last step is now you will need to send the asset that you are swapping out for theta from your wallet/exchange to the C4C Exchange. In this example we are sending litecoin.
- C4C exchange will provide you an address and you can easily copy the address by clicking the button that the arrow is pointing to or by highlighting and copying the address. (1st picture)
- You will now need to go into your wallet or exchange and send the exact amount of crypto you put in for the exchange to the address you just copied. In this example I would go into my wallet/exchange and send 1 litecoin to the address ending in etKu
- Once you have sent the crypto to the C4C exchange, it will automatically provide updates on the swap and send the theta token right to your theta wallet within usually 10-25 minutes!

TIP: Rinse & Repeat this same process with over 300+ cryptocurrency pairs anytime using the C4C exchange

Note* If you experience any issues with the swap, please contact changenow support at <https://changenow.io/contact> and provide them with the exchange ID (right picture for reference) please save your exchange ID!!!
